

Mirror Metal Ceiling

DESCRIPTION

TOPTIDE/Ceillex Mirror Metal Ceiling is made from 3-layer stainless steel honeycomb panel or aluminum honeycomb panel in big sizes and various patterns. After anodizing or polishing on stainless steel and aluminum, the surface looks like a mirror. When fabricated into metal ceiling, it reflects all the things around which is quite distinctive and the space seems bigger than before. Besides, this kind of ceilings has features of light, high strength and evenness, as well as fireproof, a certain effect of sound insulation, thermal insulation and anti-seismic. With mature suspension system, we can quickly install those large ceiling panels in conference hall, exhibition gallery, lobby and other big public areas. Large-sized mirror ceiling makes the project more magnificent and impressive. Moreover, it's recycled for energy conservation and environment protection.

PRODUCT DATA

Material: Stainless Steel, Aluminum
Surface Treatment: Anodizing, Polishing

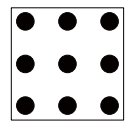

Normal Specifications

Honeycomb Panel Thickness: 10mm, 12mm, 15mm, 18mm, 20mm, 25mm
Width: 900-1100mm, Length: 1500-2400m
Front Layer Thickness: 0.6-0.9mm
Back Layer Thickness: 0.6-1.0mm
Normal Perforations:

Normal Perforations :

Plain

φ25mm Straight (lighting holes)

Surface Patterns :

Silver Mirror

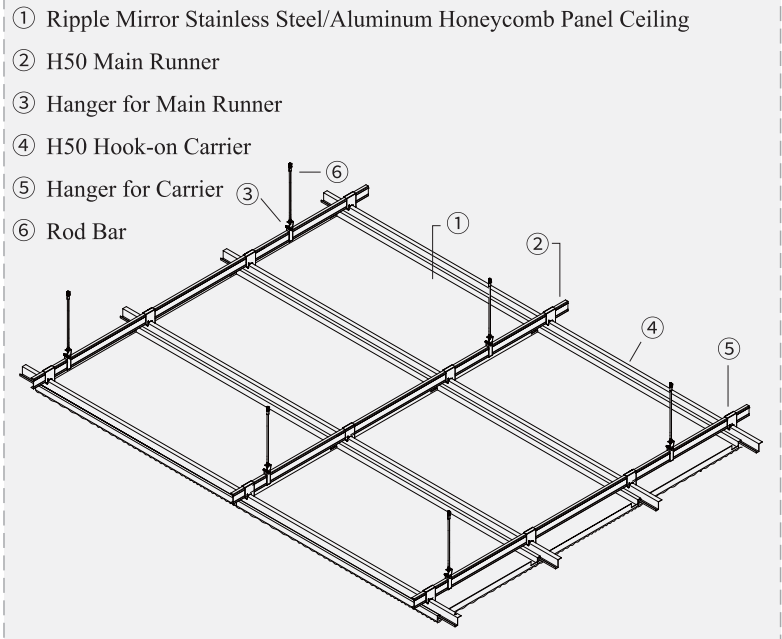

Gold Mirror

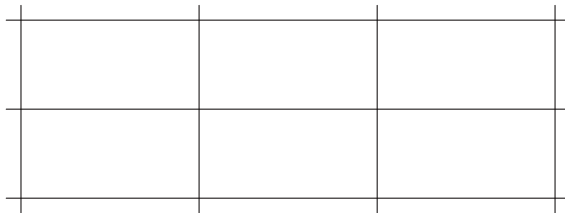

Black Mirror

ACCESSORIES

H50 Main Runner
Material: Galvanized Steel
Size: L=3000mm

Hanger for Main Runner
Material: Galvanized Steel

H50 Hook-on Carrier
Material: Galvanized Steel
Size: L=3000mm

Hanger for Carrier
Material: Galvanized Steel

Expansion Bolt
Material: Galvanized Steel
Size: M8 × 30mm

Rod Bar
Material: Galvanized Steel
Size: M8 × 3000mm

Flanged Nut
Material: Galvanized Steel
Size: M8

For different spaces, we've a full set of mature construction system. It's firm & safe, and easy to install. Lightings and air conditioners are recommended to fit ceilings, and to be one part of ceiling systems.
